Inequalities

Worksheet 2

1. W12/qp21/q2(a(ii))

Solve the inequality $3 - 2x > 5$. [2]

2. S13/qp21/q1(c)

i. Write down the integer values that satisfy $-1 \leq n < 2$. [1]

ii. Solve $2 - 3y < 8$. [2]

3. S13/qp22/q3(b)

i. Solve $\frac{4y-3}{2} \leq 7$. [2]

ii. State the integers that satisfy both $\frac{4y-3}{2} \leq 7$ and $y > 2$. [1]

4. W15/qp22/q6(b)

Solve the inequality $7 - 3x > 13$. [2]

5. W16/qp21/q2(e)

Find the integer values of n such that

$$4(2-n) > 17$$

$$n > -6$$

[2]

Answer Key:

1. $x < -1$
2. (i) -1, 0, 1 (ii) $y > -2$
3. (i) $y \leq\ 4.25$ (ii)3,4
4. $x < -2$
5. -3,-4,-5
